First review of application material will occur on May 5, 2008.

SALARY \$77,438 - \$121,867 annualized. *Appointment can be made above the minimum depending upon qualifications.*

EXPERIENCE Requires five years of responsible experience in the Information Technology field, including data center management, telecommunications, business application development, technical services, and strategic planning. Also requires two years of supervisory experience and a Bachelor's degree in Business or Public Administration, Telecommunications, Computer Science, Airport Management or a related field. The preferred candidate will also have experience establishing a technical support division of a comparable size.

DUTIES Manage the day-to-day activities of the Information Technology Division of the Aviation Department. Coordinate support activities for information technology contracts. Work through team leads to plan, organize and administer all activities of the division in support of the Airport's 24 Business Applications and Access Control Systems, Telecommunications and Fiber Optic Infrastructures, 750+ desktop workstations, and Airport Data Center. Work is performed with considerable independence and judgment under the direction of the Chief Information Officer (CIO) and the Aviation Director.
