**URS27283 Senior Civil Engineer - Utilities**

Responsibilities: Candidate must have ability to manage major utility design tasks on aviation projects, and ensure quality, financial, schedule, and other client needs are met. Requirements: Bachelor's degree in Civil Engineering, Mechanical Engineering, Architecture, or related field. Requires a minimum of 15 years in a consulting design firm environment including aviation management experience, and experience with design of utility systems. The candidate must have substantial skills in developing the aviation business, managing people, design efforts and projects, and establishing close client relations. Position requires registration as a professional engineer with the California State Board of Registration for Professional Engineers. Excellent oral and written communication required.

**URS27281 General Civil Engineer - Aviation**

Responsibilities: The candidate will organize, schedule, and prioritize assignments and tasks that may be assigned. Candidate must have a solid foundation of general civil engineering principles, strong communication skills (verbal and written), a general understanding of civil design, and an interest in airport, utility, and/or roadway design projects at medium and large airports. Requirements: Bachelor's degree in Civil Engineering with a minimum of 2 years of aviation-related experience, preferably in civil engineering consulting, municipal, DOT, and/or construction engineering. BSCE with EIT certificate. PE may be obtained during employment. Knowledge of AutoCAD and/or Microstation.
