**REQUEST FOR QUALIFICATIONS
SAND STORAGE FACILITY
GERALD R. FORD INTERNATIONAL AIRPORT**

The Gerald R. Ford International Airport Authority is inviting design-build teams to submit experience and qualifications in regards to providing professional services for the design and construction of a new sand storage facility and related improvements.

Project: The Airport uses sand as part of winter operations on the airfield. Currently, deliveries are spaced throughout the winter as usage varies from month to month. The proposed project includes the design and construction of a sand storage facility to house annual sand usage in a dry/heated environment.

Statements of Qualifications shall include information describing relevant experience, proposed team members, and project approach as described in the “Request for Qualifications (Part 1)” document available at “Doing Business Here”/”Business Opportunities” on the Gerald R. Ford International Airport Authority web site www.flyford.org.

A Pre-Proposal meeting will be held on July 17 at 10:00 AM local time in the Ford Conference Room, second floor of the airport terminal.

For questions contact Mr. Thomas Ecklund, P.E., Engineering & Facilities Director, at (616) 233-6041 or tecklund@grr.org. Please note that staff interviews and/or site visits will not be granted until consultants have been invited for final interviews.

Interested consultants should submit six (6) copies of Qualifications and standard forms to:

Mr. Thomas Ecklund, PE
Gerald R. Ford International Airport Authority
5500 44th Street, SE
Grand Rapids, MI 49512

Qualifications will be accepted until 2:00 PM local time on July 24, 2017.
