

## Senior Aviation Project Manager

Join a motivated team where your technical, communication, leadership and marketing skills converge to create an incredible career opportunity at a 100% employee-owned company that is repeatedly voted a "Best Place to Work". Burns & McDonnell is looking for the unique Aviation Project Manager that has a desire to apply their technical design and management experience, while actively engaging their entrepreneurial spirit. Directs and coordinates activities of several disciplines on a project of large to moderate scope or a combination of smaller projects. Communicates and coordinates with team all deliverables as well as scope, schedule and budget. Direct coordination with clients and other external clients. May initiate or assist in contract negotiations or preparation. Assist in direction of project planning, budgeting and establishing critical project objectives. Other duties as assigned.

Bachelor's degree in architecture and/or engineering. Minimum 10 years related experience, including resident engineering and/or field experience on airport terminal and facility projects. Minimum 5 or more years managing complex airport and airline projects. Project size may vary. Must have ability to deal effectively with a wide variety of industry, government and public contracts on project-related matters. Excellent written & verbal communication skills. Strong leadership, problem solving and project finance skills. Solid understanding of FAA criteria is required. Registered Architect preferred.
