

The San José Airport has 2 Bid opportunities available:

Bid #8391 - Mineta San Jose International Airport - Infrastructure for Zero Emission Buses

This project includes installation of electrical infrastructure (transformers, duct banks, conduit, and cable) and accessories (hand holes, distribution panels and control) for the charging stations for future electric buses.

Bid #8394 - Mineta San Jose International Airport - Lighting System Upgrade for CAT II Approach

This project includes the installation of an Uninterrupted Power Supply (UPS) and modification of the Programmable Logic Controller (PLC) for existing generators, and modification of the existing switchboard for the Airfield Approach Lighting System.

Details of these projects are available at: <http://www.flysanjose.com/bids>
